SubstanzWalk

Introduction to Substanzraum

Substanzraum - space of substance - is a new approach to global space. This slightly surreal audio walk explains to you the basics of this new conception of space itself. The audio walk is composed with a mixture of synthetic and recorded environmental sounds. These sounds blend with the actual sounds of your surroundings and evoke confusions which eventually emphasise the latter. Narrated text fragments from my essay *Substanzraum* accompany this geo-located Audio Walk.

Preparations and Instructions:

1. Download the echoes.xyz app and find my walk by searching for "SubstanzWalk". or scan the QR-code with your phone.
2. Download the walk beforehand, use open headphones (the piece is mastered for maximum volume on iPhone earphones)
3. Travel to the station **Markenseplein**, activate the walk and follow the path on the map.
4. **Activate Auto Play function** by taping the three lines top right on the map screen.
